

Weather prediction: Student worksheet

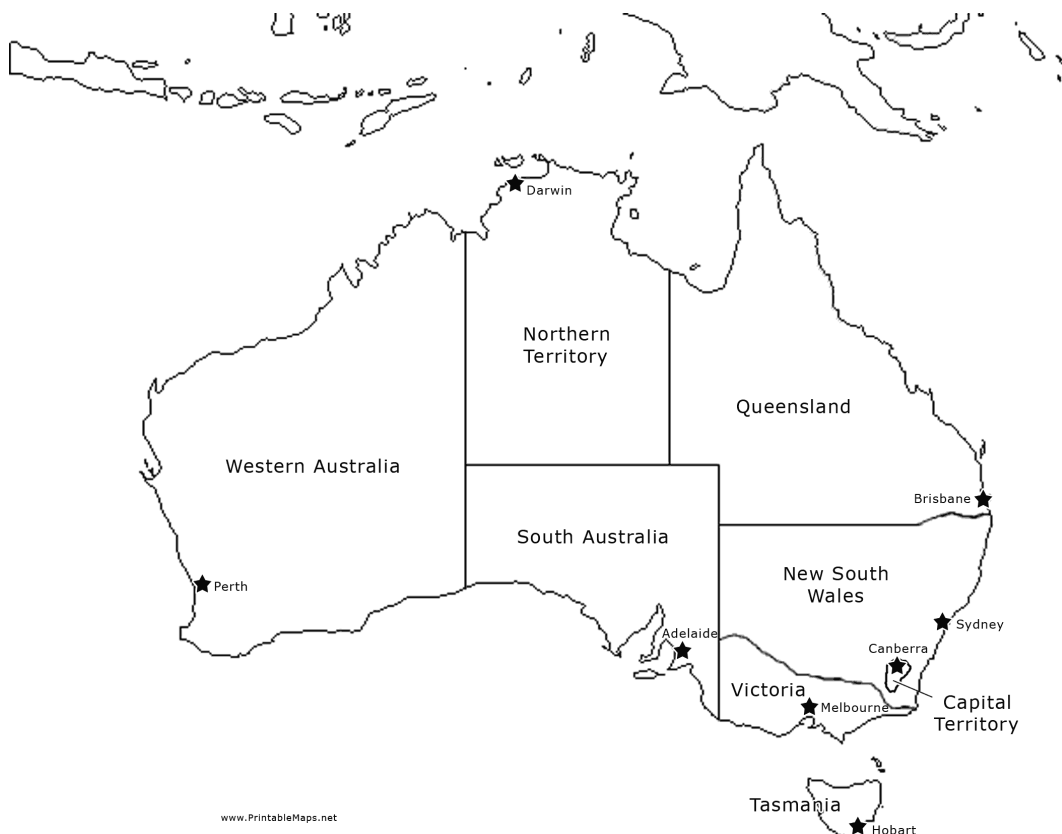

What will the weather be like in our local area tomorrow?

Using the data provided to you by your classroom teacher write a brief description of the weather in your local area over the past week. What do you think the weather will be like tomorrow?

What will the weather be like in Perth (or other capital cities) tomorrow?

Choose three Australian capital cities and create a graph to display the maximum temperature over the past week.

Using the data that has been provided about the weather over the past week make a prediction about what tomorrow's weather will be in those three capital cities. Compare your predictions with others in the class.

What would you wear? What activities could you do?

Complete the chart below to record your answers.

Capital city	Maximum temperature	Descriptive word (e.g. sunny)	Draw what you would wear	Draw an activity you could do

Extension

Work with a partner to write one-minute weather forecast for tomorrow for your local area. Present your report to your class.
